Space Heaters

Heaters, to minimize condensation, are furnished as standard equipment on all outdoor equipment. One heater is mounted in the lower rear of the breaker module and another in the lower part of the line module. These heaters are operated at half-voltage for long life.

Standard Styles/Ratings Heater only are:

3614A50H01 use for 250W at approx. 125 Volts

3614A50H02 use for 250W at approx. 250 Volts

3614A50H04 use for 95W at approx. 125 Volts

3614A50H05 use for 100W at approx. 250 Volts

Groupings of Heaters as applied to VCP Assemblies:

Drawer Parts

**Drawout Drawer for Power Transformers**

The control power transformer drawer accommodating up to 15 kVA single phase transformers with protective primary fuses is shown in connected position installed below the potential transformer.

**Drawout Drawer for Potential Transformers**

The potential transformers are the latest design cast epoxy meeting all industry standards. Up to three potential transformers can be supplied per drawer.

Order Catalogue 5158-4 From Bodendiek Tool Company, Taylorville, Illinois.

Bus Supports

① Main Bus Support

Description	Style Number
5 kV	6355C58H01
15 kV Porcelain	6355C77G01

Main Bus

All main bus has fluidized bed epoxy flame retardant track resistant insulation. The bolted bus connections are silver plated for positive contact and low resistance.

The main bus supports are flame retardant track resistant glass polyester with porcelain inserts at 15 kV.

② Snubbers (Grommet)

Description	Style Number
Not Shown	Rubber Inserts
1200A	6362C41H01
2000A	6359C19H01
3000A	6359C20H01

③ Cable Compartment Components

Description	Style Number
Stand-Off Bus Supports	6444C78G01
ZST 50/5 Z	6353C97H01
ZST 100/5 Z1	6353C97H02

④ Cable Accessibility

The design provides adequate space for cable termination in the two high arrangement with cable for each circuit separated by metal barriers. Barriers are easily removed as shown.

VCP Accessories

Accessories

Each new VAC-CLAD installation is provided with a set of accessories. Depending upon customer's specifications and the nature of the installation, the accessories will include one or more of the following:

Maintenance Tool Style Number 692C311G01

Used for:
Slow closing the breaker outside the compartment.
Manually charging the breaker closing spring.
Manually opening the shutter.

① **Levering Crank** Style Number 8079A35G03 – with Clutch
For moving the breaker between the test and connected positions.
Levering Crank without Clutch #8079A35G02

Test Jumper Style Number 6367C70G01

For electrically operating the breaker while out of its compartment.

Ammeter Test Plug Style Number 7B4618G04

10 pt. Separate Source Style Number 1164046

① Clutch assembly on VCP breakers built in 1987 was removed and included on levering crank. Style #8079A35G03 will work with all vintage breakers.

Breaker Lifting Yoke Style Number 6465C68G01

Used for attachment to breaker for lifting breaker from rails.

Portable Lifting Device Style Number 6366C91H01

Used to lift breaker from rails and allow movement.
Also available – Portable lifting device. Breaker must be 12" above floor Style 6366C91H02

Transport Dolly Style Number 6350C33G01

For moving breaker about outside its compartment.

Rail Clamps Style Number 6365C18G01 – 2 Req'd

For clamping breaker on extended rails for maintenance.
