## Protective Relay ANSI/IEEE Device Numbers (C37.2) Alphabetical

### Note:

These are ANSI/IEEE Device Numbers for the most common application of each relay. Special applications could mean different device numbers.

| Relay Type                                  | ANSI<br>Device<br>Number | Function                                      |
|---------------------------------------------|--------------------------|-----------------------------------------------|
| AR.....                                     | 94X, Y, Z                | Tripping Auxiliary                            |
| ARS.....                                    | 94X, Y, Z                | Tripping Auxiliary                            |
| BL-1.....                                   | 49                       | Thermal                                       |
| CA (Generator) .....                        | 87                       | Differential Protective                       |
| CA (Transformer) .....                      | 87                       | Differential Protective                       |
| CA-16.....                                  | 87                       | Differential Protective                       |
| CA-26.....                                  | 87                       | Differential Protective                       |
| CF-1.....                                   | 81                       | Frequency                                     |
| CGRS.....                                   | 46N                      | Ground Overcurrent with Restraint             |
| CM.....                                     | 46                       | Phase Balance                                 |
| CO-2, 4, 5, 6, 7, 8, 9, 11 (with IIT)@..... | 50/51 @                  | Ac Time and Instantaneous Overcurrent@        |
| CO-2, 4, 5, 6, 7, 8, 9, 11 (Phase).....     | 51                       | Time Overcurrent                              |
| CO-2, 4, 5, 6, 7, 8, 9, 11 (Ground) .....   | 51N                      | Time Overcurrent Ground                       |
| COD.....                                    | 90                       | Regulating Device (Current)                   |
| COM-5, 6, 7, 8, 9, 11 .....                 | 51/50                    | Ac Time or Instantaneous Overcurrent          |
| COQ.....                                    | 46                       | Phase Balance, Negative Sequence              |
| COV-5, 6, 7, 8, 9, 11 .....                 | 51/27                    | Time Overcurrent/Undervoltage                 |
| CP.....                                     | 47                       | Phase Sequence Voltage                        |
| CR-2, 5, 6, 7, 8, 9, 11 (Phase) .....       | 67                       | Directional Overcurrent                       |
| CR-2, 5, 6, 7, 8, 9, 11 (Ground) .....      | 67N                      | Directional Overcurrent Ground                |
| CRC-2, 5, 6, 7, 8, 9, 11 .....              | 67N                      | Directional Overcurrent Ground                |
| CRD-2, 5, 6, 7, 8, 9, 11 .....              | 67N                      | Directional Overcurrent Ground                |
| CRN-1.....                                  | 32                       | Directional Power                             |
| CRP-2, 5, 6, 7, 8, 9, 11 .....              | 67N                      | Directional Overcurrent Ground                |
| CRQ-2, 5, 6, 7, 8, 9, 11 .....              | 67N                      | Directional Overcurrent Ground                |
| CT.....                                     | 49                       | Thermal (RTD)                                 |
| CV (Frequency Compensated).....             | 27/59                    | Undervoltage and Overvoltage                  |
| CV-1, 2, 4, 5, 6, 7, 8 .....                | 27/59                    | Undervoltage and Overvoltage                  |
| CV-21, 22, 24, 25, 26 .....                 | 27/59                    | Undervoltage and Overvoltage                  |
| CVD.....                                    | 27/59                    | Undervoltage and Overvoltage                  |
| CVE, CVE-1.....                             | 25                       | Synchronism-check                             |
| CVQ.....                                    | 27                       | Undervoltage                                  |
| CW.....                                     | 32                       | Directional Power                             |
| CWC.....                                    | 67N                      | Directional Overcurrent Ground                |
| CWD.....                                    | 32                       | Directional Power                             |
| CWP, CWP-1.....                             | 32N                      | Directional Ground                            |
| D-3.....                                    | 37/76                    | Dc Undercurrent or Overcurrent                |
| DGF.....                                    | 64                       | Dc Ground                                     |
| DGSH.....                                   | 27                       | Ground Protective (3d Harmonic)               |
| DRC-1.....                                  | 79                       | Reclosing                                     |
| DT-3.....                                   | 49                       | Thermal                                       |
| H-3.....                                    | 32                       | Directional Power                             |
| HCB-1, -2, -3 .....                         | 87                       | Differential Pilot-Wire Relaying              |
| HRU.....                                    | 50                       | Instantaneous Overcurrent, Harmonic Restraint |
| HU, HU-1, HU-4 .....                        | 87                       | Differential Protective                       |
| HV-3 .....                                  | 32                       | Directional Power                             |
| HV-4 .....                                  | 32                       | Directional Power                             |
| IRC-2, 5, 6, 7, 8, 9, 11 .....              | 67N                      | Directional Overcurrent Ground@               |
| IRD-2, 5, 6, 7, 8, 9, 11 .....              | 67N                      | Directional Overcurrent Ground@               |
| IRQ-2, 5, 6, 7, 8, 9, 11 .....              | 67N                      | Directional Overcurrent Ground@               |
| IRV-2, 5, 6, 7, 8, 9, 11 .....              | 67                       | Directional Overcurrent Ground@               |
| IT.....                                     | 50                       | Instantaneous Overcurrent                     |
| ITH.....                                    | 50                       | Instantaneous Overcurrent                     |
| JL.....                                     | 30                       | Annunciator Relay                             |
| JM.....                                     | 30                       | Annunciator Relay                             |
| KA-1 .....                                  | 85                       | Over-Reaching Transfer Trip                   |
| KA-4 .....                                  | 85                       | Carrier Auxiliary                             |
| KAB.....                                    | 87B                      | Differential                                  |
| KC-2, -4 .....                              | 50                       | Instantaneous Overcurrent                     |
| KD-3, -5, -10 .....                         | 21                       | Distance Phase                                |
| KD-11.....                                  | 21                       | Distance Phase                                |
| KDTG.....                                   | 67N/2                    | Ac Directional Overcurrent Ground With Timer  |
| KDXG.....                                   | 21N                      | Distance Phase                                |
| KF.....                                     | 81                       | Frequency                                     |
| KH-1, 2, 21 .....                           | 67                       | Overcurrent                                   |
| KLF, KLF-1 .....                            | 40                       | Field Relay                                   |
| KO-1, -3 .....                              | 50                       | Instantaneous Overcurrent                     |
| KP.....                                     | 47                       | Phase Sequence Voltage                        |
| KQS.....                                    | 83G                      | Phase Selector                                |

## Protective Relay ANSI/IEEE Device Numbers (C37.2) Numerical

### Note:

These are Device Numbers for the most common application of each relay. Special applications could mean different device numbers.

| IEEE<br>Device<br>Number            | Relay<br>Type                             | Function                                   |

## Protective Relays and Relaying Systems

### Relay Literature Index

Refer to Price Lists 41-020 and 41-021 for prices and ordering information.  
For Relay-Instrument Switchboards, refer to Section 40-100.

| Relay Type                      | Catalog Number | Reference Date | Instruction Leaflet                     | Renewal Parts Data | Application Data |

② This apparatus not listed in 41-000 Price Lists, and must be negotiated.

⑤ 4-zone terminal, use 3 KD-4, 1 KD-41, and 1 TD-2.

⑥ TD-4 or TD-5 timers can be substituted.

Westinghouse

## Protective Relays and Relaying Systems

### Application Index

Refer to Price Lists 41-020 and 41-021 for prices and ordering information.

Refer to Selling Policy 41-000 for standard terms and conditions of sale.

#### Literature Reference Nomenclature

AD = Application Data

IL = Instruction Leaflet

DB = Descriptive Bulletin

L = Leaflet

PB = Product Bulletin

Where no literature reference is shown, consult nearest Westinghouse sales office for information.
