The following diagrams refer to Flexitest Switch listing given in Catalog Section 37-225. Note that each wiring diagram has a style number reference corresponding to style numbers listed in the Catalog Section.

On each wiring diagram of Flexitest Switch, top letters represent knife blade switch numbers molded into front of switch case and connected to instruments or relays and lower numbers represent wire designations from instrument transformers or control source to lower rear studs.

SCHEMATIC DIAGRAM FOR WATTHOUR METERS

DIAGRAM A—Standard Connections for CB-3 and CB-2 WHM (Rear View)

Supersedes issue of Diagram Section 37-225 dated December, 1946
