

Class 8945 controllers offer reliable motor control for applications up to 1500V AC maximum. They include a load-break motor circuit switch, provision for fuses, a contactor, two control units and an overload relay assembly with current transformers.

All devices features rugged molded coils which resist moisture and difficult environments. Superior contact material provides excellent load switching and long electrical life. Both coils and contacts can be inspected and easily serviced without removing any wiring.

**TYPE MVX 1500V AC CONTROLLERS**

No. of Poles	Continuous Current Rating Amperes	Type	Price
3 Pole Polyphase	100	MVX-7	\$5650.
	150	MVX-8	6650.

**TYPE MVX-7**  
STANDARD DEVICE DOES NOT INCLUDE FUSES, CONTROL RELAY, TRANSFORMER AND SURGE ARRESTERS SHOWN ABOVE.

**APPROXIMATE DIMENSIONS**
